Verkeersdoden 1950-2016

Risks

Personal feelings towards cycling (why)

- Comfortable
- No annoyances
- Easy
- No delays
- Cheap
- Reliable planning (being on time)
- Being able to be oneself
- Fast
- Fun
- Safe
- Independant
- Flexible

Public reasons to invest in cycling

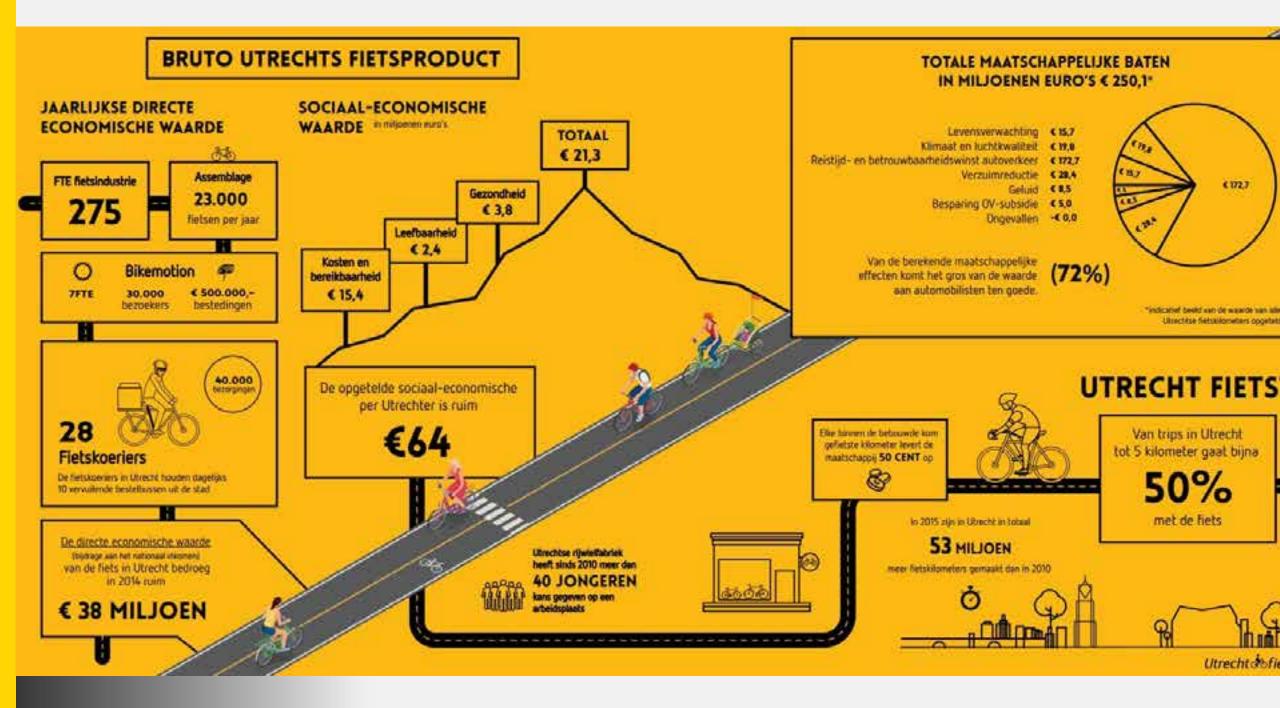

- Cycling is an accessible and fast means of transport (all ages and most abilities)
- Lack of space for more cars/PT infra (old inner cities)
- Improving the Public Transport system
- EU Air quality/sound legislation (building)
- SMART mobility (MaaS)

More and more:

- Health
- Climate change

Cycling at the local level

- 355 local municipalities and decreasing every year
- Responsible for local building and environmental schemes
- Focus authority for cycling infra
- Relatively small means or budget
- Relatively big impact on cycling quality

Cycling at the regional level

- 12 provinces
- 21 water authorities
- Several regional transport authorities

Responsible for:

- Regional building schemes
- Mobility schemes and infra for all modalities
- Public transport plans and funding
- Traffic safety programmes
- Modal shift programmes
- Regional cycling routes

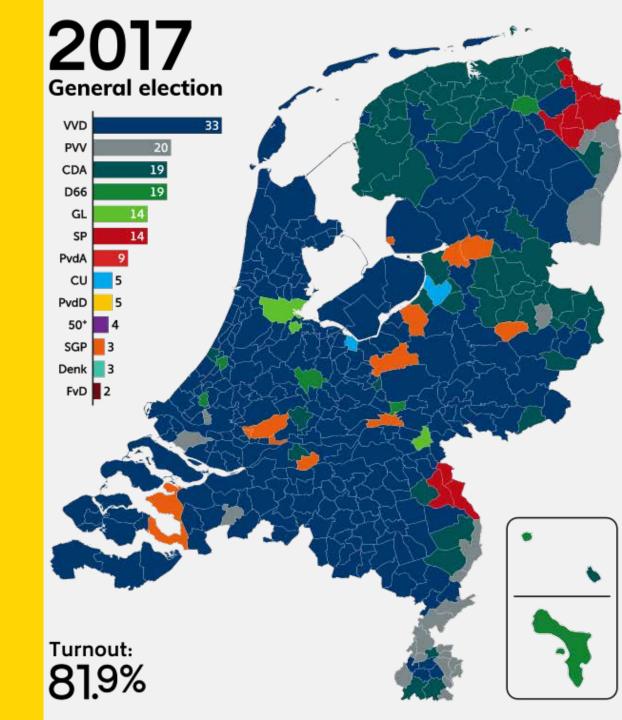

Cycling at the national level

- Investments for national important infra structures
- Safety regulations (who goes where at what speed)
- Some vehicle specific safety regulations (helmets f.e.)
- Employer scheme's to reduce traffic congestion and air pollution (modal shift)
- Traffic safety education schemes

On cycling:

- Masterplan Fiets 1997
- Tour de Force
- Investment plans for bike parking at stations
- Investment plans for regional fast cycling routes
- Traffic safety education

Fietsersbond

Online campaiging

- Promise to cycle more
- Use a bike courier
- Unsafe cycling infra map
- Cycling cities campaign etcetc

Laat je kinderen vaker naar school fietsen. Doe de fietsbelofte!

WWW.FIETSERSBOND.NL/BELOFTE

Fietsen heeft een positieve invloed op de leerprestaties.

Kinderen leren veilig zelfstandig in het verkeer op pad te gaan.

...

Than keeping it still simple Smart design

Go for pretty if you can

Together you are stronger 1

Improving accessibility for cars

- Red light delays for all
- 9 mln euro to solve problem
- 6 mln to built a elevated roundabout instead of tunnels
- Payed for by car budget
- International attention elevated the ambitions of Eindhoven as cycling city.

Together you are str National air policy p Maastricht

Improving airquility

- Highway through city became tunnel
- On top of the tunnel a wunderfull park
- Better airquality
- (Much) higher prices for houses

Together you are stronger Billing Hybrid Oriented Devepment

(hybride orienten entwicklung)

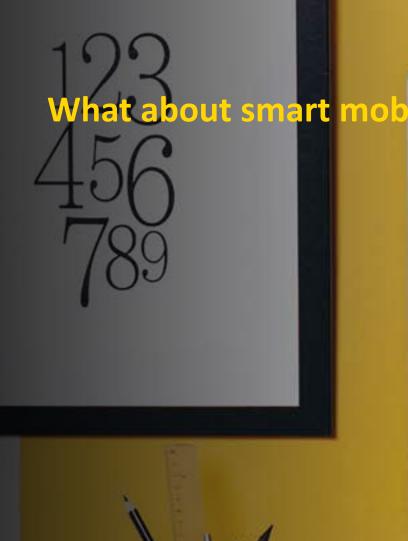

Multimodal train project

- Multimodal hub
 - Cars, bikes and (to be) tram
- Part of main station/city center project
- Walking and cycling routes improved
- Bike parking
- Financed mostly by rail budget

Future proof?

~

Tips 101 to ADFC:

- Be creative
- Be flexible and focused
- Change and adapt your strategies to opportunities
- And most of all: be like Sun Zu. Very patient...

Do we want autonomous cars in 2030 or autonomous people?
